## PROFESSIONAL SUMMARY

Fresh graduate in Information Technology (IT) with hands-on experience in full-stack web development, mobile optimization, and infrastructure management. Proven ability to write clean, maintainable production code and optimize relational database architectures to improve system efficiency. Skilled in translating complex technical requirements into scalable digital solutions while adhering to strict system testing and quality standards. A fast learner and collaborative team player eager to contribute problem-solving skills to a dynamic, production-driven team.

## WORK EXPERIENCE

**Software Developer Intern** **December 2025 - March 2026**

Ebean Group Sdn Bhd

- Developed responsive full-stack web applications using Laravel, optimizing backend MySQL database architectures to reduce query response times.
- Developed cross-platform mobile apps with Expo and React Native in order to provide similar user experience with both iOS and Android systems.
- Integrated the Leaflet Map API to implement interactive, real-time geospatial mapping for tracking and displaying wildlife documentation across the Pulau Banding rainforest.

**System Analyst Intern**

HeiTech Padu Berhad – Assigned to Ministry of Tourism, Arts and Culture (MOTAC) **April 2022 - June 2022**

- Analyzed and resolved client-reported issues related to tourism licensing systems, ensuring timely and accurate problem resolution.
- Managed and maintained database records to support system functionality and data integrity.
- Conducted system testing to identify bugs, verify fixes, and ensure smooth deployment of updates.

**IT / Software Assistant (MySTEP FA5 BPM)**

Department of Statistics Malaysia (DOSM) – Putrajaya **August 2026 - Present**

- Developed and enhanced application systems to streamline data collection and processing for Economic Census 2026.
- Executed comprehensive testing and debugging on newly developed and modified application features prior to deployment.
- Conducted systematic data verification for Economic Census operations while providing technical support and training briefings to end-users.

## EDUCATION

**Bachelor of Information Technology (Honours) in Computer Application Development** **2023 - 2026**

University Poly-Tech Malaysia (UPTM)
Dean's list award (Semester 5, 6, and 8)

CGPA 3.76

## PROJECT EXPERIENCE

**WildLife - Document Wild Nature in Pulau Banding**

January 2026 - March 2026

- Architected a comprehensive web and mobile platform
- Implemented secure user authentication
- Integrated the Leaflet Map API to implement interactive geospatial mapping
- Engineered an advanced search and multi-layer filtering interface that enables users to identify animal species.

**SmartHealth - Patient Monitoring & Advising System**

August 2025 – November 2025

- Develop a web application designed for real-time patient health tracking and medical advising.
- Developed a secure user authentication system.
- Implemented a Doctor's Portal and Dashboard.
- Integrated an AI-driven advising engine to analyze user health metrics.

## TECHNICAL SKILLS

- **Core Programming:** PHP, Java, TypeScript, JavaScript, Python, Dart, HTML.
- **Web & Mobile Frameworks:** Laravel, React, Next.js, Node.js, Expo React Native, Flutter, Spring Boot.
- **Database & Cloud Backend:** MySQL, Firebase (Authentication & Firestore)
- **Tools & Infrastructure:** Git/GitHub, Netlify, Android Studio, VS Code
- **Quality & Engineering QA:** System Testing, Bug Tracking, System Analysis, IT Troubleshooting
